CONTENTS

Inequalities for uniform deviations of averages from expectations with applications to nonparametric regression *M. Kohler* 1

Limit theorems for kernel-type estimators for the time of change *I. Grabovsky, L. Horváth and M. Hušková* 25

Limit theorems for a class of tests of gradual changes *M. Hušková and J. Steinebach* 57

Relations for expectations of functions of generalized order statistics *E. Cramer and U. Kamps* 79

Measures of multivariate dependence based on a distance between Fisher information matrices *K. Zografos* 91

Upper bounds for coverage probabilities of confidence intervals for non-monotone parametric functions *S.K. Bar-Lev, D. Bshouty and B. Reiser* 109

Accelerated test models with the inverse Gaussian distribution *A. Onar and W.J. Padgett* 119

Functional estimation under interval censoring case 1 *S. Yang* 135

Nonparametric regression estimators for length biased data *J.A. Cristóbal and J.T. Alcalá* 145

Another view of the Kuks–Olman estimator *B.F. Arnold and P. Stahlecker* 169

MSE dominance of the PT-2SHI estimator over the positive-part Stein-rule estimator in regression *A. Namba* 175

A decision rule for discarding principal components in regression *T. Foucart* 187

Robust regression with both continuous and categorical predictors *R.A. Maronna and V.J. Yohai* 197

Some results for robust GM-based estimators in heteroscedastic regression models *A. Bianco, G. Boente and J. di Rienzo* 215

Necessary and sufficient conditions for consistency of *M*-estimates in regression models with general errors *A. Berlinet, F. Liese and I. Vajda* 243

About optimal designs for estimating variance components with ANOVA in one-way-classification under non-normality *V. Guiard, G. Herrendörfer, D. Sumpf and G. Nürnberg* 269
